Summary: Capable of making web applications using MERN stack (Mongodb, Express js, React js, Node js). Familiar with react development tools such as redux, redux saga. Also can create wonderful things using firebase as the service. Passionate on web development, especially front end development and always hungry to learn.

Work Experiences

Stocklio AS - Oslo, Norway

- **React Developer** (January 2023 - Present)
 - Write clean and maintainable code using react js, redux (saga)
 - Collaborating and developing new feature
 - Fixing bugs
 - Create backend service using cloud function
 - Maintain cloud function to provide expected response
 - Write documentation to help people who work with our code

Educations

- **Al Kaaffah (Vocational High School)** – Computer and Networking Engineering (2014 - 2017)
- **Eduwork (Bootcamp)** – MERN Stack (August 2022 - December 2022)

Licenses and Certifications

- Web Development (MERN) - Eduwork

Personal Projects

- **Funtastic Toy Shop** - Express js, React js, Mongodb
Simple e-commerce app made by Express js (back end), React js (front end) and Mongodb (database).
- **Weather App** - React js
Simple weather app made by React js and using free api by Open Weather API.
- **Fresh Fruits** - HTML, CSS, Javascript
Single section page of fruits made by HTML, CSS, and Javascript.

Activities and Organizations

Student Council - Al Kaaffah (Vocational High School)

- **President**
 - Coordinate the team to execute student council programs
 - Make a plan and make decision of student council programs
 - Make sure the execution was sticking on the plan

Skills

HTML • CSS • SASS • Tailwind • Javascript • Typescript • React js • Redux • Redux Saga • Express js • Node js • Mongodb • Firebase • MYSQL • Git

Tools

VS Code • Figma (Basic) • Github
